### **OVERVIEW OF CONTROLS**

# 3.REMOTE CONTROL UNIT

# CONNECTING TO TV SCART/VGA TERMINAL(OPTIONAL)

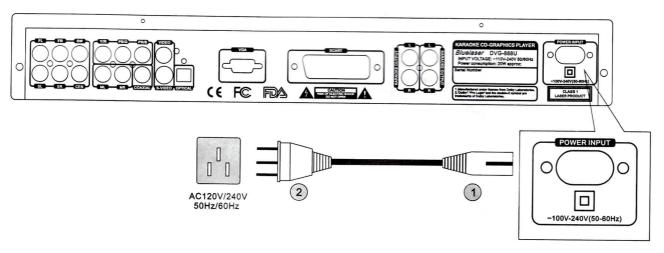

# MAKING THE CONNECTIONS

#### CAUTION:

Always turn OFF the power of your television and this player both when making connections by the Video and Audio Cords.

### **Power Cord Connection**

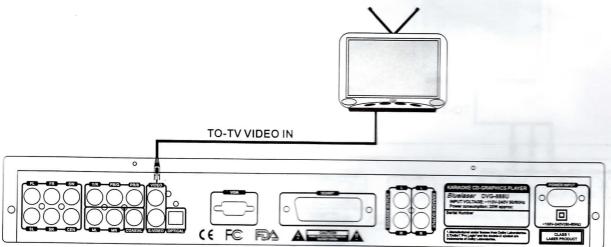

1. Connect the AC power cord to the unit.

2. Connect the unit's power plug to the wall outlet.

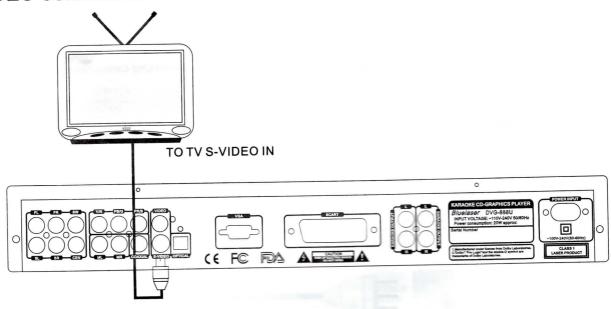

WARNING: Switch power button to OFF when the machine is not in use.
Unplug the power cord if it is not use for a long time.

# Composite Video Output Connection

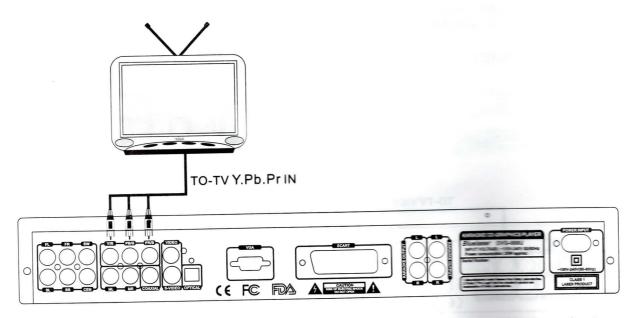

Using an AV cable, connect the unit's VIDEO OUTPUT jack to the VIDEO IN jack of your TV set.

# **S-VIDEO Connection**

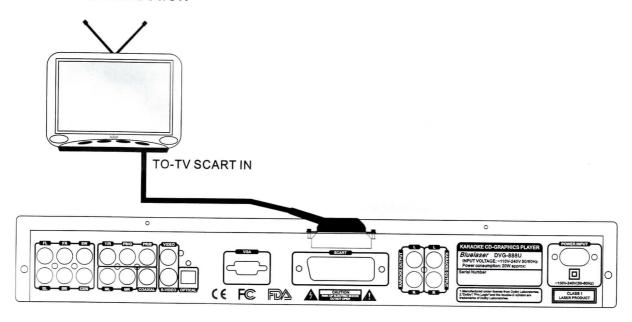

With an S-VIDEO cable, connect the unit's S-VIDEO OUTPUT jack to the S-VIDEO IN jack of your TV set which should be set to S-VIDEO mode.

### Y.PB.PR Connection

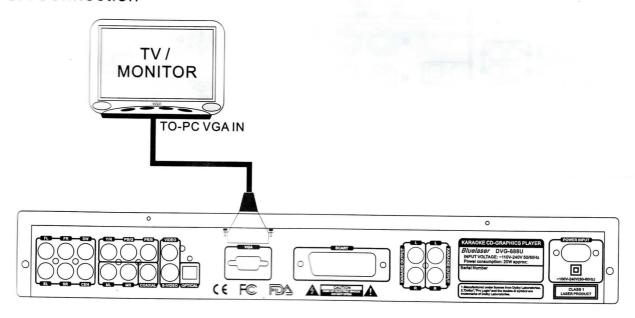

With proper AV cable, connect the unit's Y.Pb.Pr RCA jacks to your TV's Y.Pb.Pr N jacks and set in Y.Pb.Pr mode.

# SCART Connection

This is for your TV set with SCART jack. You need a scart cable to get audio and video output. Connect one end of cable to the unit's SCART OUTPUT jack and plug the other end to the SCART IN jack of your TV set. The TV should be set in SCART mode.

### VGA Connection

Use a VGA cable to connect the unit's VGA jack and to your TV/MONITOR. You will get a better picture from its progressive scan function.

Y.

#### **AUDIO CONNECTION**

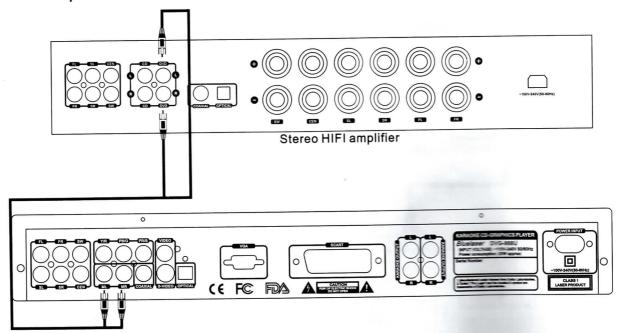

This unit is a DVD player. It has 5 audio outputs which can be connected to different audio systems.

### 5.1 channel output

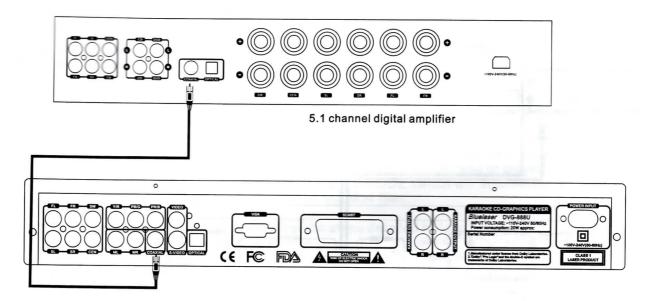

Connect the unit's FL. FR. SL. SR. CEN and SW jacks to any 5.1 channel amplifier system.

### Stereo output

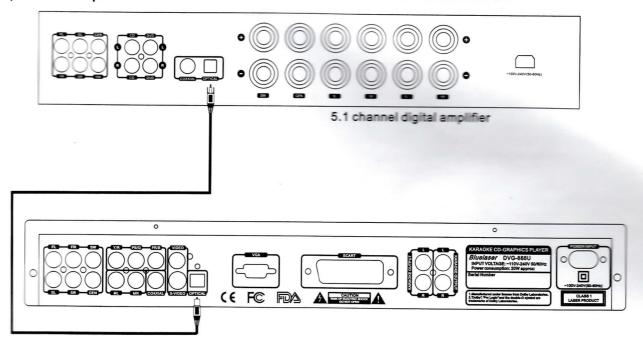

Connect unit's ML, MR jacks to any HI-FI amplifier's AUDIO IN to get stereo music or vocal output.

# Coaxial output

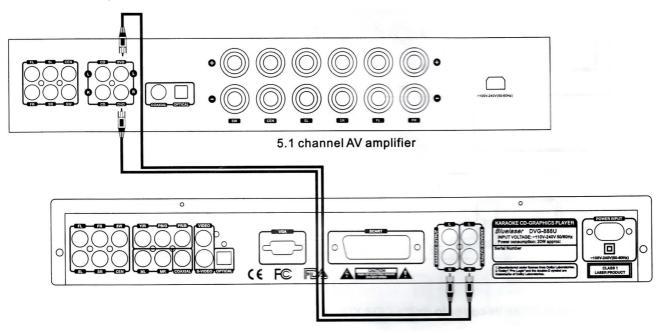

Connect any digital amplifier/decoder to unit's COAXIAL output jacks.

### Optical output

Use an optical cable to connect the digital amplifier/decoder to this unit's OPTICAL OUT jack.

# Karaoke output

Connect one end of cable to the KARAOKE OUTPUT and connect the other end of the cable to STEREO INPUT jacks on the amplifier. This is for your KARAOKE entertainment. You will get both music and vocal.

#### **USB INPUT JACK AND OPERATION**

You can play vocal and music files stored in any external memory devices (e.g., fresh stick, flash drive, card reader, external hard drive/player, etc.) by connecting any one of such devises to the unit's front panel USB IN.

The unit's default MODE or function is on DVD, provided your external memory device is not connected to the USB IN terminal.

If no disc is being played, the unit MODE switch will automatically select the USB IN to play the music in the external memory devise connected. If a disc is played, it will be read or played first; after the last song or chapter is read or played, the unit's MODE switch will automatically transfer to USB IN. The unit supports Mp3, JPG, WMA and Mp4 files.

If you need to switch to USB playback, please follow the steps detailed below:

- 1. Press the STOP button;
- 2. Press the USB/DVD button to make the USB menu appear on the screen;
- 3. Select item to play with the directional buttons; and
- 4. Press ENTER button to enter your selection.

Repeat above steps to switch back to DVD playback.

Note: Please make sure the player is at stop before selecting or operating in another mode.

#### **PLAYING MODES**

#### KARAOKE MODE

This mode is designed for karaoke entertainment. To select this mode, press KARAOKE button on your remote control. To ensure proper mixing level of background music and singer's vocal, connect and set your microphone at correct audio level (minus speakers' feedback). Under KARAOKE mode, CD or CD+G disc stops automatically at the end of each song. PLAY button must be pressed again for the next song. The setting of KEY control is reset or goes back to default setting after every song is played. Note: If audio cables are connected with ML and MR output jacks, there is no audio signal output.

#### STEREO MODE

For HI-FI stereo output, press STEREO button on the REMOTE CONTROL to enter this mode.

NOTE: In this mode, music or audio output only comes from ML, MR, FL, FR and KARAOKE OUT jacks.

#### 5.1 CHANNEL MODE

To view and enjoy movies with 5.1 sound track, press 5.1 CH button on your remote control (RC).

NOTE: In this mode, 8 audio outputs are active (ML, MR, FL, FR, CEN, SL, SR and SW) from the DOLBY 5.1 DVDisc.

#### **PROGRAM MODE**

To program or select the playing sequence of sound tracks, press STOP and then PROGRAM, PROG will appear on the unit's VFD screen. Please perform the following steps (This program function does not apply on DVD, MP3 or VCD 2.0 discs):

- 1. Select the tracks you want to play by pressing your RC numerical keys. The number of track will show on screen;
- 2. Press ENTER button to confirm every selection. Repeat steps 1 and 2 to add more tracks. Programmed tracks will be added automatically;
- 3. Press play button to play the tracks you have programmed; and
- 4. To exit this program, press STOP button twice.

While in this program mode, you can press the CLEAR button to cancel the previous programmed track.

Note: Playing of CD+G, VCD, CD disc must be stopped to enter the Program mode. And make sure to press ENTER button to confirm the track selection each time.

### **FUNCTIONS AND OPERATION**

AUDIO	This button is used to switch to different audio tracks of DVD disc It works with DVD disc only.	
L/R	The button is set to select audio playback modes such as mono left, mono right and stereo. It's available for CD, CD+G, VCD and MP3 discs.
